Weeks, Says Mr. Smith.

Street Railway Company Busy with Dodge Street and Other Lines and Will Order New

Cars.

"Within two weeks we expect to have all the Dundee line in first-class shape, from Fortieth and Farnam to Fiftieth and Underwood avenue, the end of the line, and the Farnam street car service will be extended into that territory."

This statement was made yesterday by General Manager William A. Smith of the street railway company. Mr. Smith said further:

"We are at present repairing the Dodge street line from Tenth and Farnam to Twenty-fourth and Lake streets and the commercial avenue line from Sherman avenue to Ames avenue, besides the work under way of repairing the entire Dundee line. The work of the Dodge and Commercial lines we do not expect to have completed before some time early in the spring, because the workmen have found it very hard to remove the old cable tracks. The Dundee line will be completed within two weeks and the Farnam street car service will then be extended with a schedule of one car every twenty minutes. It is figured at present that every other car will make the through trip. The old cable cars on the Dodge line and the old cars now being used on the Dundee line will be taken to some of the other stub lines for use there.

They will not be run reguarly on these lines, but just when the travel is heaviest. Considerable difficulty is experienced in starting and stopping the large cars and time is lost, so that we do not believe that it is a paying investment to use them on lines where there are
